toPDF

Simple HTML to PDF converter library for developers built on Phalcon.

[github/toPdf](#)

mCare

A Desktop app to get data from mysql(using Node.JS) and accessing it in Angular project wrapped with Electron.

Avasar - EMS

Avasar is an Online Event Management System made in last year of my college. The Idea is to make the user just seat back and book all the services like Place, Catering, DJ, Invitations etc. for their Event. The project made on ASP.Net/C# (Web). This Project was Temporarily hosted on AWS cloud.
