Projects

ERP System for PCB Manufacturer

Built a ERP system with Phalcon PHP & AngularJS and database on MySQL at Helimp Softomation.

toPDF

Simple HTML to PDF converter with given link or HTML string build in Phalcon with use of wkhtmltopdf library.

mCare

A demo app to get existing data from MySQL database to display in the Electron CrossPlatform app. Designed with Angular 5 and data connection with NodeJS.

Avasar

Avasar is an Online Event Management Web System. It was my college project made in ASP.Net and C# with database in MSSQL Server. This project was temporarily hosted on AWS cloud.
